## **Introduction**

This Component Capability List Document has been prepared to list the components Unique Airmotive Services, L.L.C. have authority to release to service.

This repair station will not maintain or alter any item for which it is not rated or for which it does not have the required technical data, materials or trained personnel.

Copies of this document will be available to all interested parties.

Each copy of this document will have a control number and assignment entry. A master list recording the status of each copy will be kept by the Director of Quality. The FAA Accountable Manager will collate all revisions with the FAA.

Unique Airmotive Services, L.L.C. may perform maintenance, preventive maintenance, or alterations on the articles listed in this current Capability List. The FAA Accountable Manager is responsible for ensuring that Unique Airmotive Services, L.L.C.'s Capability List is consistent with the repair station ratings. Before placing an article on the Capability List, the Director of Quality will—

1. Determine that the article is within the scope of the repair station's ratings.
2. Perform a self-evaluation, form UAS424, to determine that Unique Airmotive Services, L.L.C. has the appropriate housing, facilities, equipment, material, technical data, processes, and trained personnel to perform the work on that article as required by Part 145.
3. Document the results of the self-evaluation.
4. Keep a copy of the self-evaluation assessment on file.

The FAA Accountable Manager will review and approve the evaluation before establishing or revising the Capability List. The Capability List is a controlled document and once an initial list or revision has been approved by the FAA Accountable Manager it will be forwarded to the FAA by paper means along with a copy of the "self-evaluation" within seven days of creation or revision.
